DETAILED ACTION

Drawings

1. The drawings were received on October 18, 2000. These drawings are accepted by the Examiner.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Donald A. Schurr on May 4, 2006.

The application has been amended as follows:

In claim 26, line 2, "said" has been deleted and replaced by --wherein said--.

In claim 26, line 2, "comprising" has been deleted and replaced by --comprises--.

In claim 26, line 3, "granules" has been deleted and replaced by -- granules, said ceramic coated granules comprising an inorganic base substrate in granular form having a coating which includes an amount of an alkali metal silicate binder sufficient to bind the coating to the inorganic granule, --.

In claim 26, line 3, "by" has been deleted and replaced by -- with --.

In claim 26, line 3, "being" has been deleted.

Art Unit: 1772

In claim 40, line 2, "said" has been deleted and replaced by --wherein said--.

In claim 40, line 2, "comprising" has been deleted and replaced by --comprises--.

In claim 40, line 3, "granules" has been deleted and replaced by -- granules, said ceramic coated granules comprising an inorganic base substrate in granular form having a coating which includes an amount of an alkali metal silicate binder sufficient to bind the coating to the inorganic granule, --.

In claim 40, line 3, "by" has been deleted and replaced by – with --.

3. The following is an examiner's statement of reasons for allowance:

The closest prior art of record fails to teach or suggest the recited article comprising an integrated granule product bonded to a roofing substrate. Independent claims 26 and 40 identify the uniquely distinct features of an article that include ceramic coated granules made with an inorganic granular form coated with an alkali metal silicate binder bonded to a film with a cured adhesive before the film is bonded to a roofing substrate or a asphalt-based substrate. The closest prior art of record, Tsuei (USPN 5,783,303) in view of Beesley et al. (USPN 6,238,794) and George et al. (USPN 5,484,477), disclose articles containing granular products, which either singularly or in combination, fail to anticipate or render obvious the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
